In this record of achievement during the last eight years may be read the pledges which the Republican party has fulfilled. We propose to continue these policies and we declare our constant adherence to the

Protection which guards and develops our industries is a cardinal policy of the Republican party. The measure of protection should always at least equal the difference in the cost of production at home and abroad. We insist upon the maintenance of the principles of protection and, therefore, 2-he be conditions have so changed that the are mile interest demands their alteration, but this work cannot safely be committed to any other hands than those of the Re-

publican party. To trust it to the Democratic party is to invite disaster. Whether, as in 1892, the Democratic party declared the protective tariff unconstitutional, or whether it demands tariff reform, or tariff revision, its real object is always the destruction of the protective system. However specious the name, the purpose is ever the same. A Democratic tariff has always been fol-

A Democratic tariff has always been followed by business adversity, a Republican tariff by business prosperity. To a Republican congress and a Republican president this great question can be safely intrusted. When the only free trade country among the great nations agitates a return to protection, the chief protective country should not falter in maintaining it.

We have extended widely our foreign markets, and we believe in the adoption of all practicable methods for their further extension, including commercial reciprocity wherever reciprocal arrangements can be effected consistent with the principles of protection and without injury to American agriculture, American labor, or any American industry.

We believe it to be the duty of the Re-publican party to uphold the gold standard and the integrity and value of our national currency. The maintenance of the gold standard, established by the Republican party, cannot safely be committed to the Democratic party, which resisted its adoption and has never given any proof since that time of belief in it or fidelity to it.
